LOREM IPSUM DOLOR

ABOUT US

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod

The firm dedicated solely to Structural and Geotechnical Engineering consultancy services across the Delhi & NCR.

Mr. Ankit Soni, having prominent experience from last 7 years in design consultancy, execution and as well in construction side for many prestigious projects across India; started the company and registered as proprietorship in 2019 by the name F2S.

Team F2S is committed to excellence in the structural engineering, Geotechnical engineering, Project Management, Nondestructive testing, Soil & Material testing.

We believe in developing solutions that are innovative, integrated, sustainable and represent the highest level of design.

We have a huge customer base support in central & state government authorities, Corporate Majors, IT Companies, Housing & Real Estate Developers, Industrial, Hotels, Educational Institutions, Mall cum Multiplex Developers and Public Sector Undertakings.

CLIENT ORIENTED COMMITMENT

Share with us your objectives, your vision, schedule and budget and that we can assess the feasibility of your project and get back to you with the foremost economical, efficient design and construction solutions available.

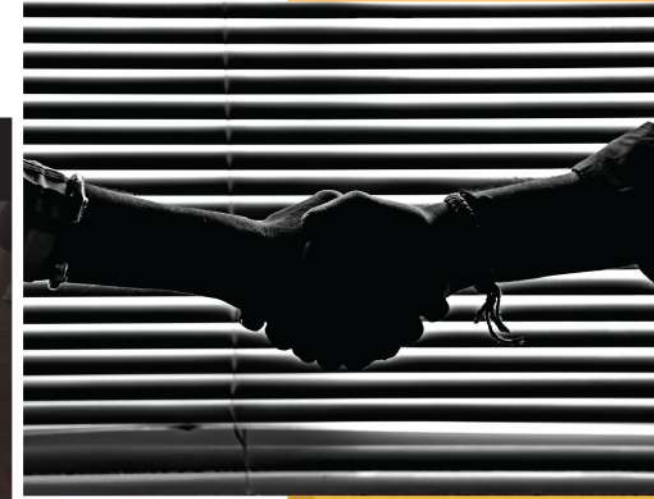

From the initial feasibility studies, through planning and development, through project design and tender stage we will help you deliver a quality solution on time and on budget.

F2S prides itself in listening to the client's objectives and project goals and then recommending the most efficient construction path and solution-oriented assistance.

We are pleased to work with owner clients directly, large government agencies, contractors or in support of other architectural/engineering firms.

Our inherited experience across Indian region over the last 2 years speaks to the true value that

F2S brings to the project design and construction team. Innovative designs utilizing proven technologies all delivered in a safe fashion, on schedule, on budget, every time

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod

LOREM IPSUM DOLOR

OUR VISION

To provide value added designs, Cost effective and safe solutions as per standards

Our mission is customer satisfaction, fulfilling all their constructional needs blend with modern technology available and our innovative design and ideas to suit local, social and ecological conditions cost effectively

OUR MISSION

WHAT SETS US APART?

A culture based on values

The core values that we strive to employ each day are integrity, honesty, respect, and responsiveness, an attitude of service, technical competency, and sense of urgency.

An integrated project approaches

Since most projects begin with the land, we often collaborate and coordinate multiple disciplines in order to optimize project results and increase value to the owner.

A commitment to responsible site development

The principles of sustainability are not new to F2S. We make choices based on knowledge of the land and sensitivity to a project's environmental impact, which leads to a more successful built environment.

Relationships built on trust, respect, and open exchange When it comes to our clients, we're looking for a long-term relationship, and we work to establish trust and open communication from the start

INITIAL DISCUSSION

The first step is to discuss, and understand projects requirements, and thought process from Clients and Architect. We share our best strategic solution which enhance the efficiency and usefulness of structure.

After initial discussion, we provide first proposal for project, in case of structural design and geotechnical design we go for modelling stage with the help of software and test the models for possible loads and displacements. These will be influenced by project scope, budget and individual requirements.

PROPOSAL AND MODELING STAGE

DEVELOPING DESIGN

We try our best to reach the expectation. Design solutions include drawings, Various plans, sectional elevation, sketches and computer renderings. Our design includes recommendation by Indian Standards (IS codes), Euro and American codes.

Once resource consent is approved, your project will progress to the detailed design phase. This means we will advance your design to the level of detail that allows a construction contractor to access the full scope of the project. This includes construction details, materials, Machinery requirements, Manpower, systems and finishes.

SUBMITTING DETAILED DESIGN AND PROJECT MANAGEMENT

A message from F2S team...

From the initial feasibility studies, through planning and development, through project design and tender stage we will help you deliver a quality solution on time and on budget.

F2S prides itself in listening to the client's Objectives and project goals and then recommending the most efficient construction path and solution-oriented assistance.

We are pleased to work with owner clients directly, large government agencies, contractor or in support of other architectural/engineering firms.

Our inherited experience across Indian region over the last 5 years speaks to the true value that F2S brings to the project design and construction team. Innovative designs utilizing proven.

"Good design and Good relationships come from collaboration"

We are ready to start a visual dialogue, learn about you and make something innovative & beautiful
