engineering services

DESIGN & ENGINEERING

for an Ever Changing World

www.berryescott.co.uk

Services

Engineering support services and design flair tailored to your business needs:

Fabrication

Stainless Steel, Mild Steel & Aluminium Solutions

Machining

Prototype, OEM Replacement, Small & Large Batch Runs

Design Services

FMEA & 3D Design for Manufacture Solutions

Pipework

Design, Manufacture & Installation of Hygienic, Chemical & Pressure Rated System

Finishing

Bead Blasting, Powder Coating, Anodising & Plating, Wet Spraying & Specialist Coatings

Plant Servicing

Routine Maintenance, Mechanical Repair & Reverse Engineering

Confined Space Entry

City & Guilds Level 2 Trained Operatives

3D Insight

3D Scanning, Point Cloud Data Capture, 3D Modelling, Technical Insight, Design Validation

Environment

Engineered Solutions to Protect the Biodiversity of our Rivers

Rapid Response

Emergency Breakdown Cover

Sectors

Some of the key sectors we provide support to:

Nuclear

Aerospace

Food & Drink

Marine

Utilities

Environment

Oil & Gas

Pharmaceutical

Renewables

Berry & Escott Directors

Lee Berry
ONC / HNC

Lee's design flair and outstanding problem solving abilities make him a real asset in setting Berry & Escott apart from the crowd. He is passionate about finding the right solution in terms of process, functionality, quality and cost.

He works with customers to improve performance and by doing so he enables them to achieve strategic goals.

Lee is a time served engineer with over 20 years of experience across the Fabrication, Mechanical Assembly, Nuclear, Water Utilities and Food & Drink Sectors. His primary expertise is in delivering technical and project management solutions from concept to fully realised outcomes.

Chris Escott
EngTech MIMechE

Chris has an outstanding ability in being able to take an idea and apply his meticulous attention to detail to convert concepts into fully realised and working engineering solutions.

His perfectionism is matched by his enthusiasm and optimistic outlook. With over 20 years of experience in Fabrication, Machining, Design and Customer Relations, Chris is more than well equipped to help lead and future proof the health of Berry & Escott in an ever changing, complex and demanding world.

Welcome

Berry & Escott has a highly responsive and creative workforce, with a proven track record of success in delivering outstanding project outcomes. When working with a customer, we see ourselves as partners in a mutually beneficial relationship.

We offer:

- Excellence in design, precision machining and total turnkey ferrous and non-ferrous fabricated solutions.
- Manufacturing processes, installation and onsite maintenance services.
- Unrivalled levels of customer service, expertise and support in our field.

We provide total sub-contracting support services in the following mechanical production areas:

- CNC Turning
- CNC Milling
- 3D CAD Design
- Hygienic & Pressure Pipe Systems
- Fabrication
- Coded Welding
- Confined Space Entry
- On-site & Off-site Maintenance
- Backup

Located in Bridgwater, Somerset, Berry & Escott was established over 30 years ago. Since then we have invested in expanding our human and physical resources, whilst steadily increasing the scale and scope of our production capabilities - we moved to our current 10,000 square feet premises at the start of 2012.

We have been committed and ambitious in utilising new technologies in our production processes and have been awarded the following: ISO 9001, ISO 14001, ISO 45001, CE Marking of Fabricated structural steelwork BS EN 1090 (EXC3), Fit 4 Nuclear, Alcumus SafeContractor and Achilles UVDB accreditations.

Our Vision

Organisation Structure - To have and sustain a management and operating structure where roles and responsibilities are clearly defined and understood.

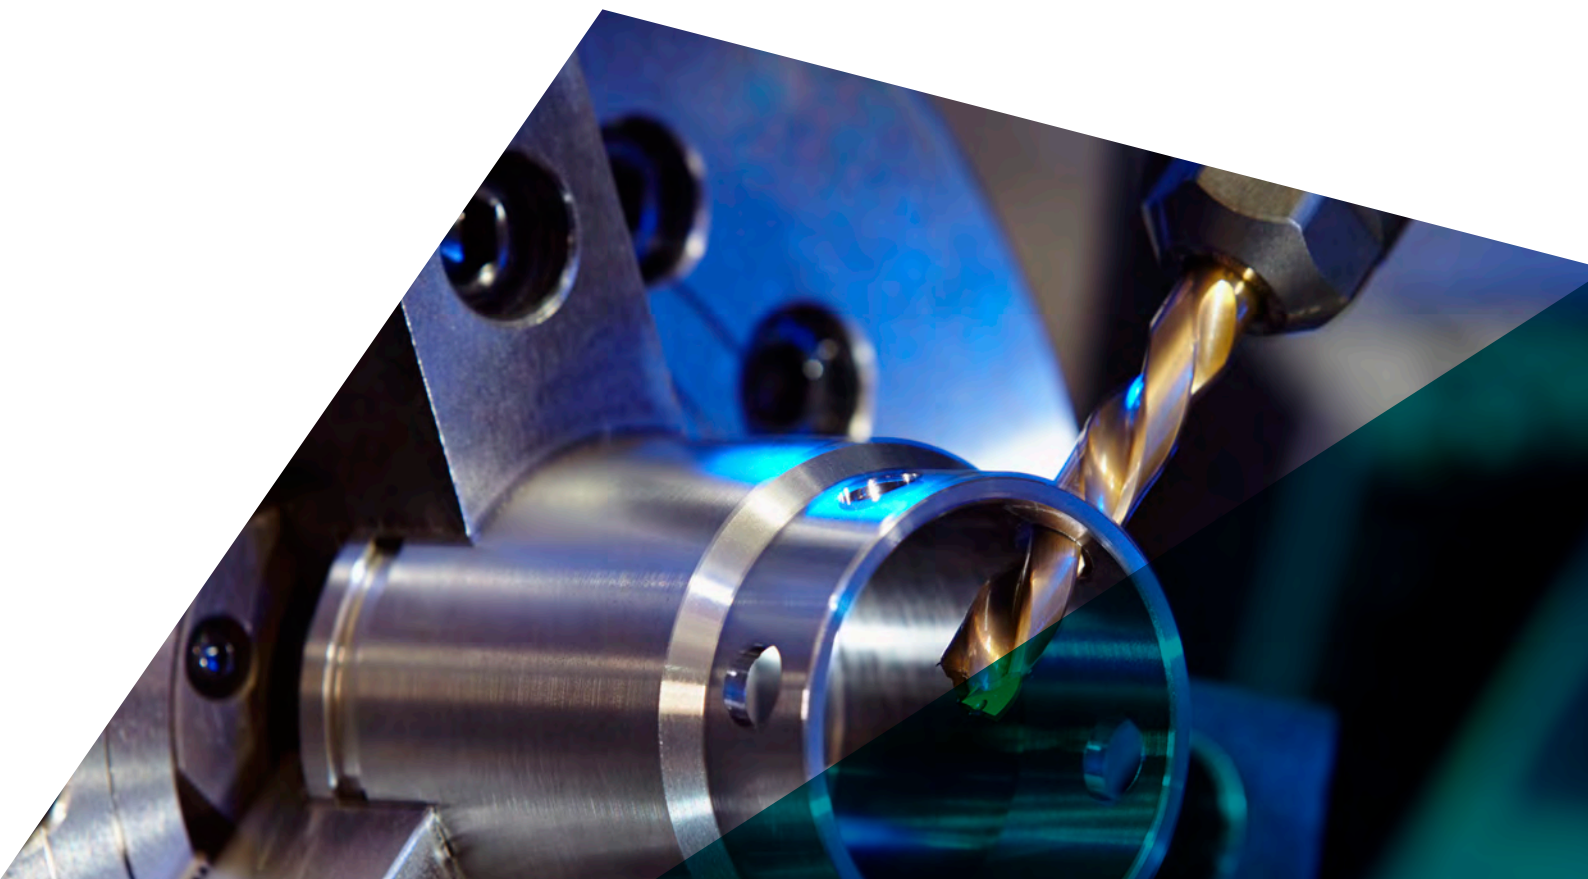

Partners - To nurture a winning network of customers and suppliers. Together we create mutually beneficial and enduring value.

People - To provide a great place to work, where people are inspired to be the best that they can be.

Perception - To be the best that we can be and surpass customer expectations.

Productivity - To be a highly effective, lean and fast moving organisation.

Planet - To be an environmentally responsible company that makes a positive difference by reducing consumption and waste.

Our Team

The Berry & Escott workforce is a highly skilled, committed and loyal team - we share a mutual passion for engineering and all things related. Our culture is one in which we value and respect every member of our team for their hard work, skills and the high quality of work they produce.

Berry & Escott support and make ongoing investment in training and qualifications, as we believe continuous improvements benefit both the individual and our business.

We offer our employees: job satisfaction, long term employment prospects and a fair wage. Mutual respect, honesty and loyalty are core values in underpinning our working relationships with colleagues. We even hope to have some fun along the way.

We want our employees to: embrace and adopt our values and, in doing so, be proud and enjoy being a member of the Berry & Escott team.

We value employees who: pay attention to detail, are reliable, supportive of and respect their colleagues, value team spirit, and recognize the importance of pulling together.

Design Services

If you have a design idea; we have the skills and technology to turn your idea into reality.

With over 30 years of experience, our Solidworks trained design engineers are well skilled in delivering the best outcomes in the manufacturing of: precision components, fabrication assemblies and OEM replacement parts along with others.

We can receive and process 2D drawings and 3D models electronically in a variety of formats, including:

Parasolid

SAT (ACIS solids)

AutoCAD (DXF, DWG, Inventor ipt files)

Solidworks

SolidEdge

CADL

STL

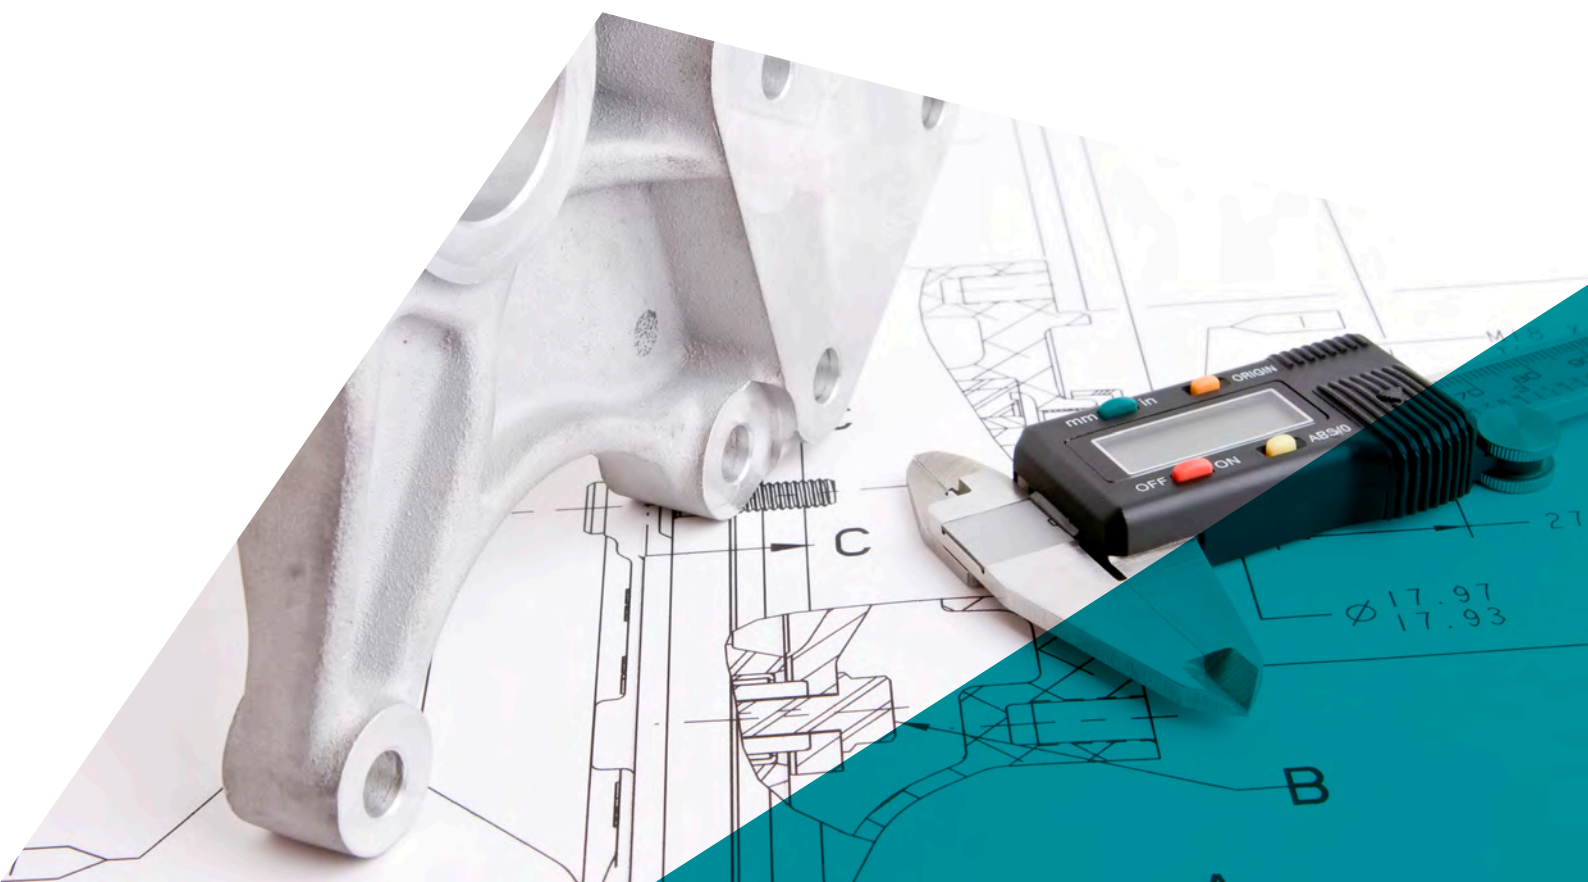

IGES

VDA

ASCII

STEP

Pro-E

Machining

With our extensive range of machines, we are capable of processing both small and large production runs.

Having invested in the latest hi tech precision machinery, we pass on the following benefits to our customers:

- Reduced production costs
- Improved Accuracy & Quality
- Reduced lead times to the customer

We undertake machining with a wide range of materials, for example:

Plastics, Composites and most Metals including Duplex, Super Duplex, Titanium, Inconel and most other Exotics

Fabrication

We have significantly increased our capabilities in 'Design for Manufacture' solutions for large sheet metal and fabricated assemblies. Customers can work with our design team in achieving the most cost effective solutions.

Welding - We can carry out most of your sub-contracting welding requirements, using Tig, Mig, Mma, Gas or Spot welding in a variety of materials:

Stainless Steels

Aluminium

Cast Materials

Mild Steels

Brass & Bronze

Inconel

Welding Traceability - Weld identification, testing and technical files, are just some of the services we can offer. This demonstrates our commitment to quality and enables us to trace materials and production data.

Weld processes or codings can be tailored to your requirements - we are accredited to ISO 15614 and we also hold a variety of codings.

Our Growth Strategy

We have developed a reputation we are proud of. We believe this is due to our on-going commitment to investing in staff and physical resources, in combination with working processes that are proven to deliver the highest quality outcomes.

We seek to future proof the growth and health of Berry & Escott by using a structured review process aimed at continuous improvement that delivers benefits to our customers as well as our team.

Our quality standards and measures will continue to relate to the following key areas:

- Exceeding our customer expectations and gain positive, new business referrals.

- Expanding our work with existing customers and develop relationships with new customers and industry sectors across the South West, the rest of the UK and beyond.

- Providing a total turnkey process by offering value adding services such as Design, Assembly, Finishing and Installation.

Working in Partnership

Our vision has always governed the way we conduct our business. First and foremost it is you our 'customers' who are our primary concern.

We aim to be more than just another engineering supplier; we wish to be your partner. It is through your successes that we will be successful.
